1. Struggling to find volunteer opportunities that actually fit your skills?
2. Finding it hard to land a job without real-world experience?

Meet Alex

- Alex is a motivated university student
- Wants volunteer experience after internship rejections
- Opens platform hoping to grow skills
- Feels overwhelmed by unclear navigation

Alex did not fail. The experience failed Alex.

Bigger Than One User

Different Users, Same Friction

Emily

High School Student

- Needs 40hrs volunteer hours for graduation
- Struggles to find nearby, flexible opportunities
- Hard to track hours consistently

Aisha

Admin Staff

- Manages tasks, submissions, and approvals
- Feels pressure due to irreversible decisions
- Lacks visibility into system changes

Daniel

Young Professional

- Wants to gain relevant skills and certifications
- Needs flexible, time-efficient opportunities
- Struggles to identify valuable tasks

Margaret

Retired Professional

- Needs simple and easy navigation
- Confused by complex layouts and terminology
- Hesitates due to fear of making mistakes

The platform works

- Features already exist
- Users can technically complete tasks

This led us to ask: Where are users feeling friction, even though the system works?

Key Pain Points

1. Dashboard Is Hard to Find

- Clicking “Manage My Tasks” defaults users to Volunteer Tasks
- To see the Dashboard, users must go back to the Volunteer Hub and click Dashboard manually

Key Pain Points

2. Confusing Terminology: “My Cart”

- Users initially think volunteering may require payment

Why it matters:

- Creates hesitation and mistrust at a critical entry point.

Key Pain Points

3. Official Hours Record Is Misplaced

- Users expect to download official hours from the Hours section or Dashboard
- The actual record is located under Certifications

Research Process

How the Mobile App Addresses Key Pain Points

Dashboard in Main Navigation

The Dashboard is placed in the main navigation bar, giving users consistent access to tasks, hours, records, and resources in one place.

Clear Task Management

“My Cart” was renamed to “To-Do List”, allowing users to add tasks using familiar, action-based language.

Easy Access to Official Records

Users can download official volunteer hours directly from the Dashboard, where summaries are expected.

Unified Dashboard Prototype

Dashboard Combines:

- User analytics
- Featured Tasks
- Achievement
- Submitted Work
- Recognitions
- Resources

ONE stop shop for all user features

● Leading Technological
Product Options

Simplified User Flows

A FRICTIONLESS experience

Prototype Improvement

Visibility of System Status

- Pending submissions
- Submission approvals
- Confirmation of submission

Builds trust through FEEDBACK.

Future Opportunities

- Profile oriented AI task personalization
- Minor specific onboarding process
- Admin Tools
- Collaborative projects

**Offering a platform that suits itself to your role.
Whether external or internal.**

Conclusion

This project is about more than UI.

Its about:

- Increasing Confidence
- Building Trust
- Active Participation

Putting Things Into Perspective

What our solution offers:

- A new mobile solution to finding volunteer work
- A new practical touchpoint for a wider range of demographics to find GLOCAL's platform
- A system that clearly communicates for all groups of users, lowering the barrier or understanding and usability

Thank you for listening!
