

GLOCAL Placement Project Showcase:

# Canadian Political Parties Mapping Project

Lillian Pianosi, Elias Titian, Joey Lee, Ethan Gallipeau, Tim Guan

# Overview of Project

- ▶ We Collected and Organized data for all Federal, Provincial, and Municipal parties in Canada.
- ▶ This data included party name, the leader, website, social media, year founded and votes
- ▶ Federal and provincial parties had logos and seated MP data collected as well.
- ▶ By compiling this data, we are creating for GLOCAL, a comprehensive list of all registered Canadian parties in one place for those who are interested

# Overview of Final Dataset

- ▶ Overall, we collected data on 358 parties, with 340 parties being currently registered
- ▶ Federal: Parties that cover national issues.
  - ▶ There are currently 15 registered parties.
- ▶ Provincial/Territorial: Parties that cover regional needs.
  - ▶ There are currently 100 registered parties.
  - ▶ Nunavut and Northwest Territories operate on a consensus government.
- ▶ Municipal: Parties that cover local services.
  - ▶ Only 3 Provinces have parties at a municipal level.
  - ▶ There are currently 225 registered parties.

| Country | Federal Parties | Seated Federal Parties |
|---------|-----------------|------------------------|
| Canada  | 15              | 5                      |

| Province/Territory    | Provincial Parties | Seated Provincial Parties | Municipal Parties |
|-----------------------|--------------------|---------------------------|-------------------|
| Alberta               | 14                 | 3                         | 5                 |
| British Columbia      | 12                 | 4                         | 73                |
| Manitoba              | 6                  | 3                         | N/A               |
| New Brunswick         | 5                  | 3                         | N/A               |
| Newfoundland          | 3                  | 3                         | N/A               |
| Northwest Territories | N/A                | N/A                       | N/A               |
| Nova Scotia           | 4                  | 3                         | N/A               |
| Nunavut               | N/A                | N/A                       | N/A               |
| Ontario               | 20                 | 4                         | N/A               |
| Prince Edward Island  | 4                  | 3                         | N/A               |
| Quebec                | 21                 | 4                         | 164               |
| Saskatchewan          | 7                  | 2                         | N/A               |
| Yukon                 | 3                  | 3                         | N/A               |

# Work Process

## ► What Work Looked Like

- We spent 5 weeks at GLOCAL spending roughly 5 hours per weekday working and learning.
- Each week of the 5 was focusing on a different task
  - Week 1: Daniel assisting and providing python material (thanks Daniel.)
  - Weeks 2-4: Data gathering, cleaning, and compiling
  - Week 5: Finishing previous work and preparing for the Project Final Showcase

## ► Skills Applied

- Python:
  - Used on CSV files and other data sets formatted in lists.
- Pandas (Python)
  - Primarily used on CSV files with data systematically formatted.
  - Sadly, Pandas wasn't used that often due to:
    - Formatting Issues/Messy Data
    - Not precisely readable by Pandas.

## Key skills, insights, and knowledge you gained through the project

### ► Communication

- Coordinated tasks, set deadlines, regular updates through Teams

### ► Research

- Efficiently researched and organized large amounts of information

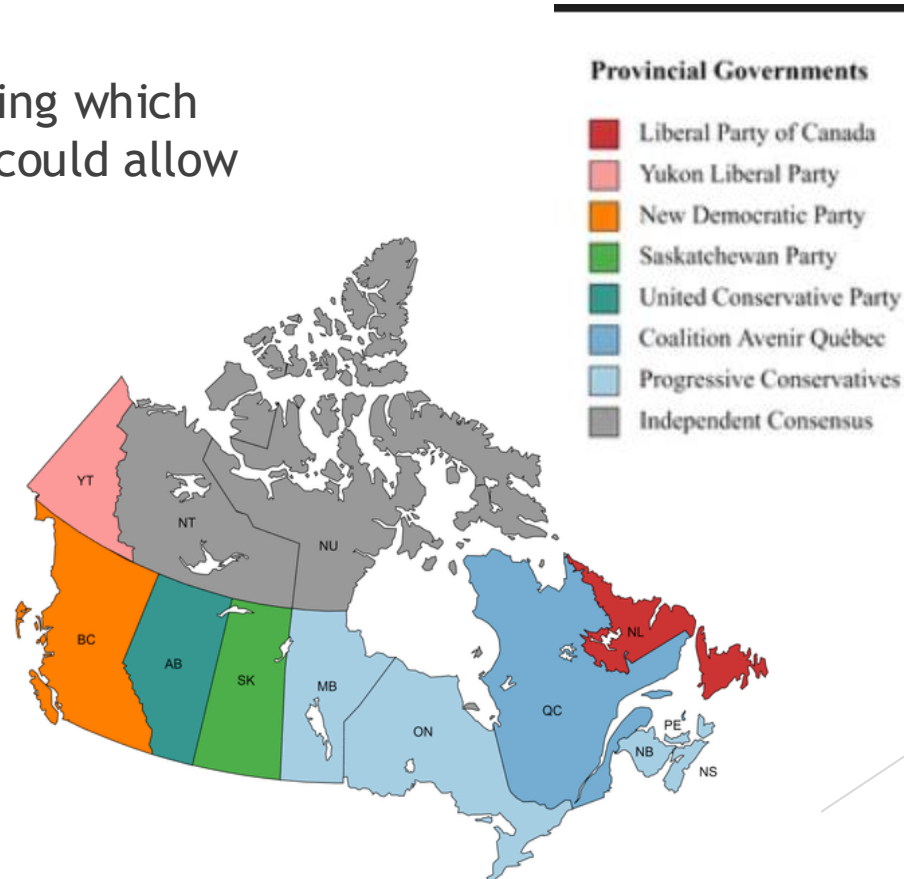

### ► Technical Agility

- Used new tools and techniques such as Pandas to organize data

# Potential Future Optimizations

- ▶ Using pandas and automated scraping earlier for the provincial data in larger provinces could save time
- ▶ Establishing a clearer plan by researching which provinces recognize municipal parties could allow for a more efficient workflow

# Challenges and how we addressed them

- ▶ Splitting the task
- ▶ Data organization
- ▶ PANDAS and Python
- ▶ Dealing with messy data (PDF)
- ▶ Finding data/Missing data
- ▶ Absence and scheduling

# Reflection of Overall Experience

- ▶ Worthwhile journey of online team experience that refined data management for future roles
- ▶ GLOCAL was very supportive and provided with a lot of support.
  - Daniel provided with the necessary skills to complete this project
  - Overall, GLOCAL helped deal with any administrative issues.
- ▶ Applying and Strengthening key skills for data management.
  - Data entry skills
  - Researching skills
- ▶ Learned new tools to organize large datasets and attained comfort in online communication
