[Volunteer Micro-grant presentation]

About me

Hello there, I'm Oluwatosin Adetola!

I am a full-time student at the university of Manitoba and a part time Volunteer at GLOCAL foundation. Volunteering at the GLOCAL foundation has been a very incredible personal journey of discovery – from mastering the art of digital communication to expressing my unique creativity through design. Along the way, I've honed invaluable social media skills, learning how to effectively engage and connect with diverse audiences. It's all about my unwavering commitment, dedication, and a deep embrace of the endless opportunities this vast online world offers. Let's come together to foster meaningful discussions, build vibrant communities, and ensure our voices resonate far and wide!"

Define

- User Personas
- User journey mapping
- Define scope of work
- User needs
- Features and Functionality.

Develop

- Paper prototype
- Wireframes
- Prototype low-fi
- Interactive designs
- Document design decisions

Deliver

- User testing
- User feedback analysis
- Research report
- Coordinating with devs to see feasibility

An aerial photograph of a dense residential neighborhood. The houses are mostly two-story structures with dark brown tiled roofs. The walls are painted in various colors including yellow, light blue, green, and white. Many houses have multiple windows with white frames. There are several palm trees and other tropical plants scattered throughout the neighborhood. The overall scene is bright and sunny, suggesting a warm climate. Two large white circular shapes are positioned in the top-left and bottom-right corners of the image.

Housifit

- **Our Problem statement:**
- With a growing number of people needing homes in Canada, I'd like to introduce "Housifit," a new app that makes finding a place to live easier. Imagine it as a helpful bridge connecting people looking for homes with those who have homes to offer. It uses smart technology to gather important info and works closely with the government. "Housifit" lets landlords and tenants talk directly, making house-hunting smoother. It's like a map for homes, helping you decide where you want to live. The app also makes sure that paying rent is negotiable by communicating with the landlord. What's cool is that it doesn't just solve the housing problem, but it also brings people in marginalized communities together by letting them share their thoughts and experiences about the app. "Housifit" is here to make finding a home in Canada easy and friendly!

Our process

Objectives

- Create a way to connect tenants and landlords on a safe and secure digital format.
- Creating a negotiable platform for people and the community to find affordable housing.
- Access to events that can be beneficial to persons looking for listings.

Quantitative Research

We analyzed data on the housing situation in Canada and how it's affecting young Canadians and the community at large

74%

Canadians report that homelessness is increasing in their communities.

Observations

90%

Young Canadians believe the government should prioritize ensuring housing is affordable

89%

of the young canadians are worried about paying rent for thier mortgage or rent in recent months

34%

Young canadians are willing to leave the country to find affordable housing

61%

revealed that their financial situation shaped by the housing crisis, negatively impacts thier mental health

User needs

- User would needs a platform that provides affordable housing to and negotiable price listing with landlords
- User need to have access to house listings, some people don't know where to find house listing.
- User need real time photos showing them houses are favorable enough for them to live in.

Features & Functionalities

To resolve user needs

Creating a a chat page
where tenants can
communicate with
Landlord can create
opportunities for
negotiation therefore
making houses affordable

Real time photos
ensuring houses are
in favourable
conditions

Access to listing
from various
houses,
apartments, rooms
e.t.c

User Challenges

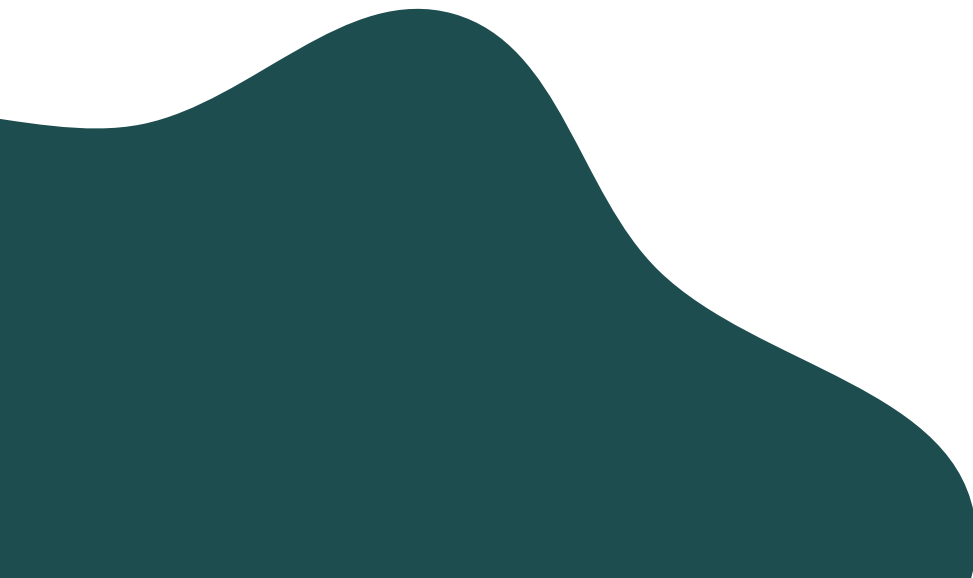

- Inaccessible housing, Most people are not aware of where to find house listing. the process of getting a place

Unaffordable housing: there is unaffordable housing for many tenants. There are not aware of the many opportunities and options out there to make the best informed decisions.

Unfavourable housing conditions: Most tenants get duped because of the housing conditions, the pictures they saw online is not matching the room there are seeing in the present

**How can we use this data
to our advantage?**

User Personas

Joan

Age: 22

Gender: *****

Location: Toronto, Canada

Occupation: Nursing
student at the University of
Toronto

Devices:   

Background

Emily is a dedicated nursing student with a passion for real estate. Originally from a small town, she moved to Toronto for her studies. Beyond her academic commitments, Emily spends her free time exploring the city and browsing real estate listings out of curiosity. She is in search of a place that not only meets her practical needs as a student but also aligns with her keen interest in interior design and property aesthetics.

Goals

- Find a comfy and convenient place near campus.
- Explore real estate options for future investments
- Connect with landlords who appreciate her passion for real estate.

Frustrations

- Unfavourable housing conditions of houses.
- Wants a place that fits her student life and is affordable

How Housifit Helps:

- Saves time by simplifying the housing search.
- Connects Emily with landlords who understand her real estate passion.
- Easy-to-use app with detailed property info matches her aesthetic interests.

“

"I'm excited to use Housifit to find a place that's perfect for my student life and matches my love for real estate."

”
